

# The Virtual 25th Annual Conference on Advancing School Mental Health

## Poster Toolkit

The National Center for School Mental Health (NCSMH) is creating a repository of poster presentations for the 25th Annual Conference on Advancing School Mental Health. We expect over 500 professionals to view your research! Poster sessions are designed to allow for more interaction between presenters and attendees.

- Create your poster on a single PowerPoint slide (or with other software). Consider the [newer format](#) for poster, and watch this [video explanation](#).
- Record a five-minute explanation (video or audio) of your poster covering the main points with the image of your poster.
- Include your contact information for attendees, so they can contact you in place of in-person chats.
- Review your recording to be sure you are satisfied.
- Submit your mp4 video file to the link provided to you from the NCSMH.

### Research posters

should include:

- Title & authors
- Introduction
- Methods
- Results
- Conclusions
- Tables and Figures
- References

**Program posters** should include:

- Title & authors
  - History of program
