Family- and Youth-Driven Wraparound.
New Hampshire’s System of Care Project

“Families And Systems Together”
Presentation for the 2016 School Mental Health Conference
September 29, 2016
Haley Heinrich
Adele Gallant
Kathleen Abate
JoAnne Malloy
Agenda

- Overview of family- and youth-driven Wraparound
- Values and roles in Wraparound
- Case Example
- Fidelity and outcome data
- Future directions
You are concerned about....

Turn to you neighbor and describe a child or youth who you know who is at risk of failing in school:

- Because of attendance issues, behavior problems, anxiety, family stressors
Where Wraparound Fits in a Multi-Tiered School-Based Model

(Adapted from Illinois PBIS Network, Revised Sept., 2008 & T. Scott, 2004)

- **Student Progress Tracker**
- **Individual Futures Plan**
- **Competing Behavior Pathway**
- **Functional Assessment Interview**
- **Weekly Progress Report**
  (Behavior and Academic Goals)
- **ODRs, Attendance, Tardies, Grades, Credits, Progress Reports, etc.**

**Tier 1/Universal**

**Tier 2**

- **School-Wide Assessment**
- **School-Wide Prevention Systems**

**Tier 3**

- **RENEW and Wraparound**
- **Simple Individual Interventions**
  (Brief FBA/BIP, Schedule/Curriculum Changes, etc)
- **Small Group Interventions**
  (CICO, Social and Academic Support Groups, etc.)
“A spectrum of effective, community-based supports, that is organized into a coordinated network, builds meaningful partnerships with families and youth, and addresses their cultural and linguistic needs, in order to help them to succeed at home, in school, in the community, and throughout life”

(Stroul & Friedman, 2010)
1. Family driven and youth guided
2. Community based
3. Culturally and linguistically competent

2010, Beth A. Stroul, M.Ed. Gary M. Blau, Ph.D. Robert M. Friedman, Ph.D. Updating the System of Care Concept and Philosophy
Positive Outcomes of System of Care Development and Implementation

• Increased positive social, academic, and behavioral outcomes and community connectedness for children, youth, and families
• Decreased out of home, school, and community placements (and duration of such)
• Increased caregiver capacity, decreased caregiver strain
• Programs and supports that are uniquely tailored to each child and family’s culture, strengths, and dreams

(Suter & Bruns, 2009; Bruns & Suter, 2010)
The Wraparound NH Model

Wraparound brings families together with supportive teams to plan and deliver supports and services that build on family-identified strengths and needs, to help families live together safely and productively in the community.
What is Wraparound?

• Wraparound is a solution-focused process that is family and youth driven.
• Wraparound connects families to supports and services in their communities, and always includes a mix of public, private, and natural supports.
• Wraparound includes access to family/youth peer support.
• Wraparound is a process that respects families’ culture and values.
• Wraparound is led by a trained facilitator.
Wraparound Is Not:

- A specific set of services offered
- A typical team meeting
- Any meeting held without family or youth
- An immediate or quick solution
- A crisis intervention or response
- A standing interagency team
Family and Peer Support Partner-

• **Member** of the individual and family team; supports and coaches the family in the wraparound process; assists family to identify, prioritize, and articulate their goals and needs.

• Ensure that the **family’s culture** is respected; provide peer to peer support that will include helping the family learn how to navigate and advocate within the system; and work with the family to gain insight of the other team members perspective.

• Fosters a sense of resilience and hope within the family.

• Provide families with information about and connect them with natural supports and resources.
Values and Principles: NH’s Wraparound Model

- Guided by Underlying Needs
- Family and Youth Driven
- Collaborative Team-Based Process
- Natural Supports
- Community-Based
- Culturally and Linguistically Competent
- Individualized
- Strengths-Based
- Outcome-Based
- Unconditional Care

Wraparound
NH Wraparound Framework

4 H’s of Wraparound

• Hello: Initial contacts of welcoming and setting the stage for “engaged enough”
• Help: Agreeing on, providing and delivering a range of interventions, services & supports
• Healing: Modifying initial helping activities to produce family report of healing
• Hope: Future oriented activities designed to sustain family experience of hope
FAST Forward Case Study
Family History

• 6 year old female diagnosed with Attachment Disorder & Anxiety
• Child adopted through child protection services by the paternal grandmother at 2 years old, after severe abuse and neglect was reported.
• Child had difficulty managing behaviors at home and school. Often would get suspended from school and sent home for throwing chairs, desks, breaking computers, hitting teachers, biting, refusal to do work, distracting other students.
• Challenges include a difficult home situation and Primary Caregiver fatigue, as Mom struggled to manage her own self-care.
Referral to FAST Forward

• Referral to FAST Forward program was made by assigned Post Adopt Services Worker from Child Protection Office.

• Mom was overwhelmed with the youth’s behavior and had limited supports. Worker stated that she was in need of someone who could help to coordinate a Wraparound team to assist the family and feel a part of their community.

• Before 1st Wraparound Team meeting: Mom communicated that having a positive relationship with the school was important to her.
Family Timeline Template

Father went to Iraq

2004
Mother pregnant with half-sibling

2010
Father came home from Iraq

2011+1F

2011
Mother took in half-sibling

2011
Rescued
FAST Forward Process

• Coordinator met with family:
  • Created Family Vision – “To be seen as being capable, loving, and loved”
  • Developed functional strengths
    • “Likes to be close to others and uses nurturing skills to help others”
    • “Is very attentive when there is a trusting relationship who is close”
    • “Likes to be a part of solutions that are made about her”
  • Identified underlying needs to why family was seeing behaviors
    • “Mom: I need to feel like a valuable person and confident as a parent.”
    • “Child: I need to know I don’t need to be scared.”
The Needs Egg

Step 1: Describe the Behavior
1. Last time Nov 17th (Thursday)
2. @ 3:30 pm: At home (Note: happens most at home)
3. Youth began hitting, kicking, biting, looking for attention
4. Didn't want to do homework → Refused to go to room as consequence
   → Cleaned shelf, cleaned books, scissors
   → Put younger sibling in "choice hold"
5. Threatened to hurt herself

Step 2: What Happened Next?
1. Mom made call to hospital
2. Went to emergency room (Police escort)
3. Stayed in ER for about 24 hrs
4. Admitted to hospital
5. Transferred to NHH (Spent one week there)

Step 3: Why Would Anyone Need to Act that Way?
1. Makes homework
2. Worried about school
3. Medication problem
4. Scared of being yelled at
5. Explaining why sibling
6. Didn't feel safe
7. Fight or flight
8. Needed to be heard
9..cut behind at school
10. Pressure from mom

Step 4: Suggest an Unmet Need
- mom
- needed to keep balance
- needed control
- needed a break
- questioned parenting
- felt alone
- didn't know what to do
- escalated own emotions
- wanted answers
- medication questions
- brought back tough memories
Team consisted of: School social worker, Post-Adopt Worker, FCSS, Family friends (natural supports), Community mental health therapist and case manager.

As a team, brainstormed strategies to help to meet underlying needs identified. Strategies include:

- Addition of In-Home Family Support, focusing on relationship building between Mom and youth and safety
- Improve communication with school
During Wraparound Team meeting process, team broke down communication strategy into ways to improve this area.

- Mom and school collaboratively developed a “communication log” that allows Mom to communicate how the youth’s morning routine was. In turn, school will fill out and send home communication log that communicates how youth did at school.

- Collaboratively work together to create a consistent behavioral plan for both school and home

- School behaviorist and Clinician at Community Mental Health Center worked together to teach Mom to mirror behavior modification techniques successful at school for use at home.

Strategy to improve communication w/ school

Notes: ____________________________________________________________
FAST Forward Outcomes

• After several Wraparound Team Meetings, which school staff attended on a consistent basis, a significant amount of progress was made:
  • Relationship with Mom and school improved
  • Collaborative efforts supported youth to have successful school days
  • Mom felt valuable in helping youth improve while in school, increasing her ability to make empowered parenting decisions at home.
  • Youth no longer felt like she needed to behave the way she was at school due to consistent behavior planning.
  • Mom built a strong relationship with teachers, and school staff which aided in supporting child’s younger siblings with similar behavior challenges
FAST Forward NH Project
Critical Roles: Wraparound Coordinators

NH Wraparound Coordinators in the Fast Forward Project (2012-2016):

- Works with families to establish wraparound teams, hold initial meetings with families, facilitates wraparound meetings and performs care coordination, facilitates referrals to other supports and services, develop crisis plans, facilitates the development of the family’s vision and plan of care, collaborates with Family and Community Support Specialists, collects data and completes required documentation.
Role of Family and Community Support Specialists

• Brings “lived” experience to the team
• Coaches and empowers the family to find their own voice in the process
• Provides resource information and connects the family with support activities
• Ensures the family’s culture is respected
• Helps family identify strengths and natural supports

Weaving the Phases Together

“Just as hello isn’t something that only happens at the outset of the arc of care, hope isn’t confined to the closing moments. Hello should kindle and nurture hope throughout the course of the process.

Help should be delivered in the context of a powerful optimism designed to increase expectancy on the part of all team members as well as families.

Healing should be recognized throughout the entire process of Wraparound as a way to acknowledge and celebrate gains and set the stage for a future of possibilities” –Pat Miles, 2014
FAST Forward NH Project

• 4-year System of Care project funded by the federal Substance Abuse and Mental Health Services Administration (SAMHSA)

• Goals:
  • Establish family/youth-driven wraparound in NH
  • Establish a funding, policy, and systems administration to support System of Care and wraparound development in NH

FAST Forward

Comparison
Looking Ahead

• NH has just received 2 more System of care grants:
  • Fast Forward 2020- Awarded to the NH Department of Education
  • A county-specific project
• Both grants stress the expansion of family- and youth-driven Wraparound, including school-based delivery-
