Customization in implementing school-based programming: An adaptive decision-making process for Mental Health Consultation

Erin Mathis, Ph.D. Megan Berkowitz, LICSW, Abby Carlson, Ph.D.,
Megan McCormick, Ph.D., Celene Domitrovich, Ph.D.
Agenda

• What is ECMHC?
• Partnerships
• Review of 2016-17 Pilot (year 1)
• Implementation of 2017-18 Pilot (year 2)
  o Adaptation and Changes
• Preview of 2018-2019 (year 3)
• Discussion Questions
Overview of ECIN

Early Childhood
Focus on pregnancy through age 5, with a particular emphasis on families from underserved communities in Washington, DC.

Innovation
Focus on new, promising, cutting-edge interventions to promote adults’ capacities to nurture the development of young children.

Network
Focus on working with communities and high-quality organizations in health care, education, and social services.

Prenatal Care
The Mothers-Babies Program will support the mental health of high-risk pregnant women during their prenatal visits. 400 pregnant women to be screened and 60 pregnant women will be provided direct service in 2018.

Pediatric Primary Care
HealthySteps is providing parenting and mental health support to families with young children. 400 families served by end of 2017 and 600 families served in 2018.

Early Childhood Education
We provide mindfulness training for parents and training in social-emotional learning for teachers. 40 parents will have participated in mindfulness training by end of 2017. 50 children attend class with ECIN-trained teachers and over 500 children learn in classrooms with mental health consultation in school year 2017-18.
Overview of ECIN

ECIN’s initial pilot projects are located in a diversity of settings across neighborhoods where interventions can provide support to families and children.

Martha’s Table/LIFT
2114 14th Street, NW
Washington, DC 20009

MedStar Washington Hospital Center
110 Irving Street, NW
Washington, DC 20010

AppleTree at Oklahoma Avenue
330 21st Street, NE
Washington, DC 20002

Educare
540 Augusta Avenue, NE
Washington, DC 20009

Children’s Health Center – Anacostia
2501 Martin Luther King Avenue, SE
Washington, DC 20030

AppleTree at Reckitts Rise Academy
2220 Reynolds Place, SE
Washington, DC 20020

AppleTree at Douglas Knoll
2022 Savannah Terrace, SE
Washington, DC 20020

AppleTree at Parklands
2201 Savannah Street, SE
Washington, DC 20020

Children’s Health Center at THEARC
1901 Mississippi Avenue, SE
Washington, DC 20020

AppleTree at Achievement Preparatory Academy
3611 Walter Place, SE
Washington, DC 20032

AppleTree at Democracy Preparatory Academy
3510 Martin Luther King Avenue, SE
Washington, DC 20032

ECIN strengthens a citywide movement to promote healthy families and children through a multi-generational, science-based approach guided by community and families. In addition to innovations across health and education settings, ECIN is:

Advocating for Policy Change
ECIN participates in policy networks, learns from partner organizations, and focuses on targeted policy issues. ECIN works closely with city government and agency leaders to ensure that law, policy, and financing optimally support young children and their families.

Strengthening Social Services
ECIN is working with Martha’s Table and LIFT to evaluate and track the impact of financial interventions on the emotional stress and executive functioning of parents, with a goal of understanding how improving financial stability may directly impact family wellness.

Leveraging Technology
ECIN is creating an app for parents participating in our various pilot projects to strengthen connections between parents, grassroots leaders, and resources in their communities.

Connecting with Neighborhood Resources
Recently awarded a Place-Based Grant from the DC Department of Health, ECIN will work to facilitate social networking within four neighborhoods in Ward 8, helping families connect to resources and community providers in the social services, workforce development, and healthcare networks.
ECIN Framework Includes Features of the IDEAS Impact Framework

Fast Cycle Iteration

Co-Creation
Early Child Mental Health Consultation

• An integrated, school-based, developmentally-aligned approach to prevention and early intervention for child social, emotional, and behavioral wellbeing
WISE Center Overview:

- Merged entity between DC-based school mental health non-profit (InSite Solutions) and MedStar Georgetown Department of Psychiatry
- Housed within the Division of Child Psychiatry; independent cost center, staff, and budget
- Combined expertise in research, design, implementation, and program evaluation to maximize impact
WISE's ECMHC Model
Three models of delivery:

- AppleTree Public Charter Schools (PS/PK Only)
- AppleTree @model Schools
- ECR Network Partners
Total Enrollment SY17-18: 1,168
At-Risk % SY17-18: 56%
ECMHC Enrollment SY17-18: 777
ECMHC At-Risk % SY17-18: 60%
Every Child Ready Curriculum

- 12 thematic units
- Book-based program
- Differentiated for three- and four-year olds
- Two-year, week-by-week scope/sequence
- Response to Intervention model
- Balance of instruction types throughout the day *(whole group, small group, centers)*
- Social Emotional Development lessons embedded into curriculum
Overview of 2016-17 Pilot

• Implemented in 2 AT schools
• Third school used as a comparison school
• Data on school climate and teacher efficacy collected at the beginning and end of the school year
• Used existing AT data collection for classroom observation (e.g. the CLASS) and student behavior (e.g. the Universal Screener)
Overview of 2016-17 Pilot

- This pilot year indicated proof of concept for the program to expand to other schools
- Expand evaluation efforts
- Initial findings from this year showed improvement in classroom climate and child behavior in consultation classrooms
Planning for Expansion

- Secured 2-year grant to expand to 5 school sites

- Pilot schools and instructional coaching feedback:
  - Classroom-level focus (spread impact)
    - Trauma-informed strategies and practices
  - Consistent implementation of SED lessons
    - How should it be emphasized throughout the day?
  - Child-focused consultation when appropriate in conjunction with RtI process
2017-18 Evaluation Model

- Measures collected beginning of school year and end of school year
  - Teacher’s sense of self-efficacy
  - School Level Environment Questionnaire
  - Faculty Trust Survey
  - Maslach Burnout measures (emotional exhaustion subscale)
- Observation measures
  - Preschool Mental Health Climate Scale (Gilliam, 2008)
  - Preschool Observation of Social Emotional Teaching (POST; Mathis & Hartz)
- Process measures
  - Teacher’s openness to consultation;
  - Teacher and consultant ratings of the consultative alliance
Classroom Observations
- Consultant observes all classrooms
- Collect data: mental health climate, classroom practices supporting children's social-emotional development

Review Data
- InSite/Georgetown team reviews observation data
- Identify classrooms in need of support based on data
- Select 3 classrooms per school per cohort

Meet with School Team
- Share data with school team and classrooms selected for cohort
- Plan for consultation in identified classrooms

Inform Teachers
- Inform teachers if they are or are not selected to participate in the cohort of consultation

School Team Meetings
- Regular meetings between consultant and school team to share progress on classroom goals and outcomes of consultation throughout each phase of cohort selection and consultation

Classroom Observations
- Consultant observes classrooms in cohort
- Data informs whether classrooms participate in additional consultation cycles

Beginning Consultation
- Establish expectations and align philosophy
- Explore teacher concerns, goals, priorities
- Collaboratively establish goals, Reflection on observation data (non-evaluative)

Middle of Consultation
- Develop and agree on plan with teacher to address goals
- Support teachers to implement plan and approach
- Update goals and plan as needed, determine if working

Ending Consultation
- When goals are met
- Review progress
- Plan for sustainability and maintaining progress
- Classrooms may participate in more than 1 cycle of consultation to reach goals

Classroom Cohort Selection (3 weeks at beginning of year, 2 weeks in between cycles)

Classroom Consultation (10 week cycles) – 3 cycles across the school year

Inform Teachers
- Inform teachers if they are or are not selected to participate in the cohort of consultation

Review Data
- InSite/Georgetown team reviews observation data
- Identify classrooms in need of support based on data
- Select 3 classrooms per school per cohort

Meet with School Team
- Share data with school team and classrooms selected for cohort
- Plan for consultation in identified classrooms

Classroom Observations
- Consultant observes all classrooms
- Collect data: mental health climate, classroom practices supporting children’s social-emotional development

School Team Meetings
- Regular meetings between consultant and school team to share progress on classroom goals and outcomes of consultation throughout each phase of cohort selection and consultation

Classroom Consultation (10 week cycles) – 3 cycles across the school year
A word on Analyses

• Innovation
  – Teacher and principal satisfaction questionnaires
  – Informal feedback
• Analyzing data between each cycle for the purpose of determining efficacy of new innovations
• Able to look at dosage of the intervention
• Will analyze whole school year together for publication
Implementation Flexibility

• Bi-weekly Implementation and Data Meetings
  – Feedback
  – Problem solving
  – **Attendees:**
    • AppleTree Positive Behavior Support Manager
    • AppleTree Director of Research and Evaluation
    • ECIN Director of Research and Innovation
    • ECIN Assistant Director of Research and Innovation
    • InSite/WISE Co-Executive Director

• Monthly ECMHC Consultant/AppleTree Check-Ins
  – “Boots on the Ground”
Implementation Flexibility

Why so many meetings?

• Feedback from the field
  – School buy-in
  – Consultant and school staff experience
  – Overall school, family, student impact
  – Is it working in its current form?

• Do we need to adjust for data and research purposes?
Evidence-Based Model

Uniqueness of a School Site
Implementation Adaptation Areas

- Data Sharing
- Direct Feedback
- Campus Trauma Trainings

Cycle 2
Implementation Adaptation Areas

Cycle 3
- Shift to Child Focused
- Engagement with Students
- Cycle to New School Site
Implementation Adaptation Areas

Planning for 2018-2019 - 1 network → 5 schools

1. Menu of Service Options
2. Increased Parent Focus
3. 1 Consultant
2018-19 Data Collection

• Beginning and end of year survey will be the same
• Observation and process measures will be the same
  – no longer on a cycle schedule
• Building out AT capacity for individual child assessment: Tier 1 student
2018-19 School Year Timeline

Initial Classroom and Student Observations and Needs Assessment
Up to the first 3 weeks of the school year

Initial Meeting with School Team to Discuss Classrooms and/or Student
(obtain parental consent for student)
(Week 1 of Consultation)

Student and/or Classroom Observation & Initial Plan Development
with Teacher(s)
(Week 1 of Consultation)

Classroom and/or Student Consultation & Observations
(WEEKS 2-3 Minimum)
Continue as long as needed

Wrap Up for Student and/or Classroom

Identify next student or classroom need

Add-in additional student any time as needed
Add-in classroom consultation any time as needed
Discussion Questions

• What has been your experience balancing implementing evidence-based interventions with practical implementation? What are the challenges?
• How do you use data to evaluate programing? Do you use it as a feedback loop?
• What have you tried to get leadership and/or teacher buy-in for new programing? What worked? What didn’t work? How do you balance the goals of everyone? Principals? Teachers?
• Do you think your school has the capacity for addressing mental health issues in schools? What do you like to change or add to your programming? What issues have come up?
Thank you!
