What Leaders Need to Know About Building Mental Health Services in Schools

Jason W. Byars
District Coordinator, Project AWARE & PBIS
Griffin-Spalding County Schools
Prevalence of Child and Adolescent Mental Disorders

Children Ages 9 - 17

- The 21% represents 4 million children and adolescents in this country who live with serious mental disorder.
- This equates to 5 or 6 children in each classroom in our schools.
Median Age of Onset

• 50% of all lifetime cases of mental illness begin by age 14, 75% by age 24 (WHO).

• Anxiety Disorders = Age 6

• ADHD and Behavior Disorders = Age 11

• Mood Disorders = Age 13

• Substance Use = Age 15

(NAMISF.org)
There is on average a 10-year delay between young people experiencing their first symptoms and receiving help.
More than 60% of people with a mental illness will not seek the help they need — stigma is one of the main reasons.
Student Health Survey Data
Total Number of Secondary Students Completing the Survey

• Griffin-Spalding
  • 14/15 = 3,380
  • 15/16 = 3,488
  • 16/17 = 3,318
  • 17/18 = 3,362

• Georgia
  • 14/15 = 629,648
  • 15/16 = 663,797
  • 16/17 = 672,307
  • 17/18 = 674,354

SunTrust Park has a seating capacity of 41,000

The mission of the Griffin-Spalding County School System is to empower students to graduate college and career ready.
Why are we seeing so many young people with these issues?
TRAUMA
What is Trauma?

- Trauma refers to extreme or chronic stress that overwhelms a person’s ability to cope & results in feeling vulnerable, helpless & afraid
- Can result from one event or a series of events
- Event(s) may be witnessed or experienced directly
- Experience is subjective
- Often interferes with relationships; self regulation; & fundamental beliefs about oneself, others & one’s place in the world
Most Common forms of Childhood Trauma

- Physical abuse
- Emotional abuse
- Sexual abuse
- Physical neglect
- Emotional neglect
What percentage of your students live with theses experiences?

- A parent who’s an alcoholic or addicted to drugs
- A parent who’s a victim of domestic violence
- Family member in jail
- Family member diagnosed with a mental illness
- The disappearance of a parent through divorce, death or abandonment
Other situations that can be traumatic

- Witnessing police activity or experiencing community violence (e.g., drive by shooting, fight at school, robbery)
- Car accidents or other serious accidents
- Life-threatening natural disasters
- Acts or threats of terrorism
- Bullying
- Life-threatening illness in a caregiver
- Life-threatening health situations and/or painful medical procedures
- A family member serving overseas in the military
What are ACEs?

ACEs are adverse childhood experiences that harm children's developing brains and lead to changing how they respond to stress and damaging their immune systems so profoundly that the effects show up decades later.

ACEs cause much of our burden of chronic disease, most mental illness, and are at the root of most violence.

<table>

</tr>
<tr>
<td></td>
<td></td>
<td>Divorce</td>
</tr>
</tbody>
</table>
Your classroom may look like this:
ACEs in the Classroom

ACEs are the greatest single predictor of health, attendance and behavior.

ACEs are the second strongest predictor, after special education status, for academic failure.

The relationship between academic achievement and health status appears much less related to income than to ACEs.
So what does trauma do to the brain?

How does it impact learning?
Nadine Burke-Harris

- How Childhood Trauma Affects Health Across a Lifetime
ACEs impact student learning

- Inability to process verbal/nonverbal written information
- Inability to effectively use language to relate to others.
- Lack of sequential organization.
- Not understanding cause and effect.
- Lack of sense of self and perspective.
- Inability to distinguish emotions.
- Lack of executive functions: setting goals, developing a plan, carrying out goals, reflecting on the process.
- Difficulty with transitions (endings & beginnings).
BRAIN RULE # 8

Stressed brains don’t learn in the same way that non stressed brains do.

John Medina, PhD, Seattle Pacific University
University of Washington
Now what do I do to support these students as an educator?
Resilience research: If you have a high ACE score, are you doomed? *No!*

The good news is that the brain is plastic, and the body wants to heal.

The brain is continually changing in response to the environment. If the toxic stress stops and is replaced by practices that build resilience, the brain can slowly undo many of the stress-induced changes.

There is well documented research on how individuals’ brains and bodies become healthier through mindfulness practices, exercise, good nutrition, adequate sleep, and healthy social interactions.
How do we see these students?

**Uninformed view**
- Anger management problems
- May have ADHD
- *Choosing* to act out & disrupt classroom (e.g., disrespectful or manipulative)
- Uncontrollable, destructive
- Non-responsive

**Uninformed response**
- Student needs consequences to correct behavior or maybe an ADHD evaluation

**Trauma-informed view**
- Maladaptive responses (in school setting)
- Seeking to get needs met
- Difficulty regulating emotions
- Lacking necessary skills
- Negative view of world (e.g., adults cannot be trusted)
- Trauma response was triggered

**Trauma-informed response**
- Student needs to learn skills to regulate emotions & we need to provide support

WI Department of Public Instruction Trauma-Sensitive Schools Resources  
http://sspw.dpi.wi.gov/sspw_mhtrauma Adapted from Daniel & Zarling (2012)
Childhood Resiliency Starts With:

A shift in thinking from “What’s wrong with you?”

to “What happened to you?”

Resilient students need resilient teachers.
How a person interacts with a child can change how a traumatized student is wired.

Understanding and empathizing with one’s experiences will allow you to react and respond to them with more compassion. Simply acknowledging that a child’s behavior may stem from trauma related anxiety may change your reaction.

By YOU having a more empathic mindset and response, you are helping children/students to develop more empathy and compassion.
All of us get sensory, escape, avoid, and tangible.

The question is not
the function—why the student is behaving this way…

but rather

Why is the student going about
getting, escaping, avoiding in such a
maladaptive way or manner?
Layer mental health services within the same framework we are providing academic and behavior supports.

Technology Monitoring

TIER I
What Software is Used?

**SysCloud**

- Scans school domain (Google) for threats of bullying, self-harm, and suicide.
- School system personnel has to monitor the activity.
- Price is per user.
- Approximately $18,000 per year for school system of 10,000 students.
- During the first semester of the 2017-18 we received 600+ alerts.
Dear, family

If you’re reading this it is because i gave up to easy…. It's not yalls fault it’s school & the bullies fault i love yall so much .. mom i know i gave u a really hard time and i'm really sorry mom...and my little brother i love u brother i'll be look down on u keeping u save .. help mom for me bc im not hear no more and she's gonna be broken help her as much as u can ik ik its hard but do it for me Ill be looking down at yall i love yall & miss yall

Love

I am so sick of cutting myself.
What Software Is Used?

Go Guardian

• Scans internet searches for threats of bullying, self-harm, and suicide.
• Go Guardian monitors the activity and sends alerts when a threat is verified.
• Price is per device that is monitored.
• Approximately $28,000 per year for school system of 10,000 students with 1 to 1 technology.
GoGuardian Searches

- 8/23 XXXX - searched internet about poisons used to kill people, “fastest killing poisons.”
- 8/23 XXXX - looking on internet about how to make a noose.
- 8/24 XXXX - looked on internet and searched “What happens if you put a plastic bag on your head.”
- 8/29 XXXX googled, “How to end your life” and “Why teachers hate kids.”
- 8/31 XXXX- Searched internet, “Why am I feeling very down lately. I feel like I want to end my life.”
- 8/31 XXXX - googled “I want to die.”
- 8/31 XXXX - searched internet about “How to kill yourself.”
- 9/7 XXXX created a Google Doc that only had “I want to die” written on the page
- 9/7 XXXX searched the internet for the Suicide Hotline phone number
- 11/17 XXXX - “I want to kill myself. Please help.”
- 1/26 XXXX- “How to kill yourself in school.”
Begins July 1, 2018 in GSCS

- Provides monitoring of Social Media
- Access to over 1 billion posts daily
- Applies over 450,000 behavior threat indicators
- School system receives alerts in real time

Hi. I'm Kat, a 13-year-old student at Cowan Road Middle School. I'm reaching out to you for help lately my self-esteem levels have been dangerously low and need someone to save me. As you know that suicide is a dangerous thing and I know that I don't want to die I just don't know what to do anymore so please when you get the chance plz respond granted I doubt that you will get this email in time, but as you always say keep hope and maybe a slight miracle will happen.

Technology Acceptable Use

• “Students accessing any network services from any school computer shall comply with the GSCS policies and procedures for appropriate behavior.”

• “Administrative staff and teachers reserve the right to monitor any and all use of technology resources by students including electronic mail and internet use.”
Youth Mental Health First Aid Training (TIER I)
YMHFA Action Plan

• Assess for risk of suicide or harm
• Listen non-judgmentally
• Give reassurance and information
• Encourage appropriate professional help
• Encourage self-help and other support strategies
Youth Mental Health First Aid

SESSION 1

• To understand the prevalence of various mental health disorders impacting youth and the need for reduced stigma in communities.
• To recognize the warning signs of mental health problems that may impact youth, primarily those aged 12 – 18.
• To understand the risk and protective factors that can impact a youth’s mental health and resiliency.
Youth Mental Health First Aid

**SESSION 2**

- To apply a five-step action plan encompassing the skills, resources and knowledge to assess the situation; to select and implement appropriate interventions; and to help the youth in crisis connect with appropriate, evidence-based treatment and supports.

- To identify and access the community resources available to support youth and their families.
Resource Mapping

TIER I
Resource Mapping

Process at the school level to identify:
1. mental health supports
2. academic supports
3. behavior supports

provided by the school for students with different levels of need.
Resource Mapping Questions

• What tiered resources are currently in place in our school?
• How do students access the resources?
• How many students are served by these resources?
Gap Analysis

• Describe any gap in Tier 1 supports available to students? How will that gap be filled?

• Describe any gap in Tier 2 supports available to students? How will that gap be filled?

• Describe any gap in Tier 3 supports available to students? How will that gap be filled?

• Describe any gap in Tier 4 (In GA = Special Ed) supports available to students? How will that gap be filled?
Why is Resource Mapping So Important?

We do not want to identify a need and then not have the resources to meet the need.
Universal Screening
Mental Health and Behavior Screening (TIER I)
School-Based Universal Screening Defined

Universal screening seeks to assess all students in a school and to identify students who otherwise might have been missed by reliance on teacher referrals (Eklund et al., 2009)
Universal Screening

**Middle School** – Strengths & Difficulties Questionnaire (SDQ) – Self-Report.

**High School** – Strengths & Difficulties Questionnaire (SDQ) – Self-Report.
Elementary School

- **WHO** – Completed by classroom teachers for each student on their roster whose parent/guardian has consented (*If the student has not been in a teachers’ class for at least 30 days, it is recommended that they DO NOT screen that student.*) 85% of parents consented to the screening.

- **WHEN** – Two times per year:
  - Fall (September) 4 weeks after the start of the school year
  - Winter (January) 4 weeks after the start of second semester

*For the first screening, schools allowed extra time for an explanation and directions. Once teachers understand the process and become familiar with the SRSS, the time needed to complete the screener was reduced.*
HOW to screen students on the SRSS-IE?
For each student, rate them on each item going across the row horizontally.

<table>
<thead>
<tr>
<th>DATE:</th>
<th>Student Risk Screening Scale- Internalizing and Externalizing (SRSS-IE) 2.0</th>
</tr>
</thead>
<tbody>
<tr>
<td>TEACHER NAME</td>
<td>ELEMENTARY USE 2014 - 2015</td>
</tr>
</tbody>
</table>

0 = Never  
1 = Occasionally  
2 = Sometimes  
3 = Frequently  

Use the above scale to rate each item for each student.

As you are completing the SRSS-IE...

• Ask yourself
  – “Am I being objective in my ratings of each child?”
  – “For each item, do I have evidence to support my rating on this item?”
SRSS-IE Cut Scores

Externalizing Scale Score
Scores below 3  “No indication of concern”
Scores of 4 – 8  “Slightly raised”
Scores of 9 or more “Elevated”

Internalizing Scale Score
Scores of 0 – 1  “No indication of concern”
Scores of 2 – 3  “Slightly raised”
Scores of 4 or more “Elevated”

BASE RATE = ‘SLIGHTLY RAISED’ + ‘ELEVATED’
### Schoolwide (N=404) Base Rates

Secondary School

• **WHO** – Completed online by students using Survey Monkey. 80% participation rate for grades 6-12.

• **WHEN** – Two times per year:
  – Fall (September) 4 weeks after the start of the school year
  – Winter (February) 4 weeks after the start of second semester
• **HOW to administer the SDQ** –
  – All students whose parent/guardian’s have consented complete the SDQ using the web-based Survey Monkey form.
  – Students enter their grade, gender, race/ethnicity and unique ID #’s into the survey form.
  – Per the action plan, the SDQ is administered in the school’s computer lab. Students rotate through the computer lab throughout the day.
  – Per the action plan, at least two educators will coordinate the process on the day(s) of screening.
The Strengths & Difficulties Questionnaire (SDQ)

• A brief behavioral screening questionnaire administered to adolescents using self report.
• 25 items that can be grouped and scored on a number of scales. For low-risk or general population samples the SDQ can be divided into "internalizing problems" and "externalizing problems" for screening purposes.
• It exists in several versions to meet various needs, including alternate forms for parent or teacher completion.

(Goodman et al., 2010)
(Goodman, 2013)
(Goodman, Lamping, & Ploubidis, 2010)
SDQ Administration & Scoring Criteria

• The SDQ is comprised of five scales with five corresponding items
• Each item is scored on a three-point Likert type scale
  – Not true=0; Somewhat true=1; Certainly true=2
• Factor analytically derived tool based on standard classification of psychological disorders
SDQ Scales

- Emotional Problems
- Peer Problems
- Behavioral Problems
- Hyperactivity Problems
- Pro-social Behavior

- Internalizing
- Externalizing

Goodman, Lamping, & Ploubidis, 2010
**SDQ Overview**

**SDQ scales and corresponding items**

<table>
<thead>
<tr>

The mission of the Griffin-Spalding County School System is to empower students to graduate college and career ready.
Universal Screening Results

School-Wide Base Rate > 20%
- Tier I Universal System Support
- Sources of Strength
- Social-Emotional Curriculum

School-Wide Base Rate < 20%, but Classroom Base Rate > 20%
- Tier I Classroom Support
- Classroom Check Up
- PBIS Classroom Web Chats

School-Wide Base Rate < 20% & Classroom Base Rate < 20%
- Tier II Group or Individual Support
- Positive Action
- Second Step
How Do We Use The Results?
Tier I

• Used the data to determine the 5 most at-risk elementary schools and implemented Social-Emotional Learning Curriculum school-wide.

• Use the data to address internalizing needs at the secondary school and implement *Sources of Strength* at 1 high school and 2 middle schools.

• Use the data to drive professional learning needs of the faculty and staff by providing *Non-Violent Crisis Intervention Training* and *Youth Mental Health First Aid*. 
Tier II

• Data is used to identify students who may be at-risk and would benefit from supports in a small group setting.

• Generally there are more students identified for Tier II supports than we have personnel to provide the interventions.

• Results of the Universal Screener is only 1 piece of the data that is used by the school’s PBIS Tier II Team to determine appropriate interventions for the students.
Tier III

• Highest priority is placed on students who score in the *Highly Elevated* range on both the internalizing and externalizing scales.

• Rarely are the teams surprised by the names that show up on both of the universal screening scales.

• In addition to providing school supports these students are provided with contacts to community resources that would benefit them.
Mindfulness Practices
TIER I and II
Breathing and Relaxation Exercises
Emotion Regulation

Social-Emotional Learning
TIER I and II
Curriculum in GSCS

- Used at Tier I and Tier II
- Tier I – Guidance Counselors use the curriculum for classroom guidance lessons.
- Tier II – Guidance Counselors and Mental Health Clinicians use the curriculum for skill building in small groups.
- Used in all ISS programs.

Positive Action®

- Used at Tier I and Tier II
- Tier I – Used school-wide in 5 elementary schools. The remaining 6 will roll out in 2018-19.
- Tier II – Guidance Counselors and Mental Health Clinicians use the curriculum for skill building in small groups.
Focus on Skill Building Groups
TIER II
All of us get sensory, escape, avoid, and tangible.

The question is not the function—why the student is behaving this way…

but rather

Why is the student going about getting, escaping, avoiding in such a maladaptive way or manner?
Challenging behavior is reflective of a developmental delay.

In order for students to behave adaptively they need: motivation and skills.

Many years we have focused on motivation.

Research says focus on the SKILLS part.
Conscious Discipline

• Conscious Discipline is an evidence-based, trauma informed approach.
• Discipline issues are viewed as opportunities to teach and build skills.
• Create a culture of compassion.

The mission of the Griffin-Spalding County School System is to empower students to graduate college and career ready.
7 Skills of Discipline

• These seven skills transform everyday discipline issues into teachable moments, equipping children with the social-emotional and communication skills needed to manage themselves, resolve conflict and develop healthy behavior.
Break Boxes (FunandFunction.com)

- All Counselors
- All Self-Contained Special Education Classes
- Supports Self-Regulation
- Helps students calm down, channel energy, and focus
Zones of Regulation

• The Zones is a systematic, cognitive behavioral approach used to teach self-regulation by categorizing all the different ways we feel and states of alertness we experience into four concrete colored zones.

<table>
<thead>
<tr>
<th>BLUE ZONE</th>
<th>GREEN ZONE</th>
<th>YELLOW ZONE</th>
<th>RED ZONE</th>
</tr>
</thead>
<tbody>
<tr>
<td>Sad, Sick, Tired</td>
<td>Happy, Calm, Feeling Okay, Focused</td>
<td>Frustrated, Worried, Silly/Wiggly, Excited, Loss of Some Control</td>
<td>Mad/Angry, Mean, Terrified, Yelling/Hitting, Out of Control</td>
</tr>
<tr>
<td>Bored, Moving Slowly</td>
<td>Ready to Learn</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

The mission of the Griffin-Spalding County School System is to empower students to graduate college and career ready.
Zones of Regulation

• By addressing underlying deficits in emotional and sensory regulation, executive functioning, and social cognition, the framework is designed to help move students toward independent regulation.
“Kids will do well if they can... kids with behavioral challenges are not attention-seeking, manipulative, limit-testing, coercive, or unmotivated, but they lack the skills to behave adaptively.”

REFERRAL SYSTEM
(Tier II & III)
Two Types of Referrals

School Based
- Generally Tier II due to frequency and duration of the interventions
- Typically includes small group counseling that meets 1X per week.

Community Based
- Generally Tier III due to frequency, duration and intensity of the intervention.
- Typically includes individual therapy sessions.
Two Types of Referrals

School Based
• Most likely done by:
  • Counselor
  • Social Worker
  • Mental Health Clinician
  • Teacher
  • Administrator

Community Based
• Most likely done by:
  • Psychiatrist
  • Licensed Professional Counselor
  • Therapist
  • Community Service Board
GSCS Project AWARE Referral Process Data Uses

- Allows us to document follow-up contact with the families to confirm they have been to a service provider.
- Analyze data to help us determine where Tier II and III interventions are needed.
- Data collection tool for RTI meetings.
- Triangulates data with Universal Screening.
- Documentation for legal liability.
Wraparound Services

- Pathways Community Service Board
- McIntosh Trail Community Service Board
- Grace Harbour, Inc.
- Professional Associates Healthcare of Georgia

Columbia Suicide Severity Rating Scale (C-SSRS)

- The C-SSRS is an evidence-based screening scale that is designed to screen for suicidal ideation and behavior. This training is for student services personnel (counselors, social workers, school nurses, etc.) who receive referrals and need to triage these referrals to community services.
- All GSCS Guidance Counselors, Psychologists, Social Workers and Mental Health Clinicians are trained to administer the scale.

The mission of the Griffin-Spalding County School System is to empower students to graduate college and career ready.
Suicide and Self Harm Protocol (Tier III)
Suicide or Self Harm Flowchart
Student Safety Plan

• Contract between the student and the school that details a plan of action if the student is self-harming, having suicidal ideations or homicidal ideations.

• Required when a student returns from hospitalization.

• The student is responsible of outlining their plan.

• Includes a list of local resources.

• Adapted for elementary students.
Student Safety Plan

Step 1: Warning Signs (thoughts, images, mood, situation, behavior) that a crisis may be developing.
1. 
2. 
3. 

Step 2: “On My Own” Coping Strategies – Things to de-stress
1. 
2. 
3. 

Step 3: “With Others” strategies for Distraction and Support: People and Social Settings
1. 
2. 
3. 

Step 4: People Whom I Can Ask for Help When I Feel Bad/Suicidal
1. 
2. 
3. 

Step 5: Professionals or Agencies I Can Contact During A Crisis
1. Trusted Adult Name and Phone Number
2. Clinician Name and Phone Number
3. Local Urgent Care Name and Phone Number
4. Georgia Crisis and Access Line – 1-800-715-4225
5. National Suicide Prevention Lifeline – 1-800-273-TALK (8255)

Step 6: Making the School Environment Safe
1. 
2. 
3. 

One thing that is important to me and worth living for:

Parent Acknowledgement Form

- Informs the parent their child’s risk of suicide, homicide or self-harm.
- Acknowledges the parents have been advised to seek medical and/or mental health services.
- Request for permission for the school to discuss the student with appropriate medical personnel.
- Notifies parents a DFACS referral may result if due care is not given to the student.
- Provides a list of resources.
Griffin-Spalding County School System
Parent Acknowledgement Form

I, or we, ____________________________________________, the parent[s]/guardian[s]/custodian[s] of ________________________, were involved in a conference with school personnel on the date of ____________________.

We were made aware of our child’s suicidal/homicidal/self-harm risk. I have been advised to seek the services of a mental health agency or therapist immediately.

I give permission for school personnel to disclose information regarding my child’s suicidal/homicidal/self-harm risk to mental health and medical professionals who may evaluate or treat my child in the future.

I DO NOT give permission for school personnel to disclose information regarding my child’s suicidal/homicidal/self-harm risk to mental health and medical professionals who may evaluate or treat my child in the future.

In addition, I have been made aware that if the school determines that my student’s behavior is a threat to self, and that if I do not follow through with intervention, a referral to the Department of Family and Children Services may be considered.
