Addressing Alaska's "Remote Reality" through Innovative Distance Delivery Solutions —by Lyon Johnson

"... Every time I set-up, install and use the device... I think of a new application for it or I think of a faster, more efficient, or more effective way to do what we do. That is—

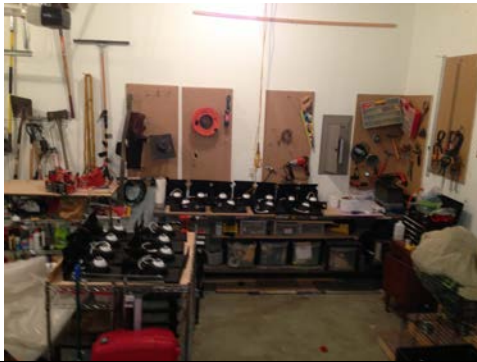

What does "Tele-Practice" look like?

- Could be:
 - A "synchronous," "asynchronous" or "blended" mode of delivery
 - Used for assessments, intervention or progress monitoring
 - A hardware device interfaced with cloud-based or computer-based software or App

Tele-Practice Technologies in Alaskan Schools

The infographic displays various educational technologies used in Alaskan schools. It includes logos for CLASS DOJO, SurveyMonkey, Google+, ScreenFlow, and BOOMERANG FOR Gmail. It also features icons representing different activities like 'Helping others', 'Working hard', 'Talking out of line', and 'Participating'. A central image shows a laptop with a video call in progress, surrounded by icons for a headset, microphone, and camera.

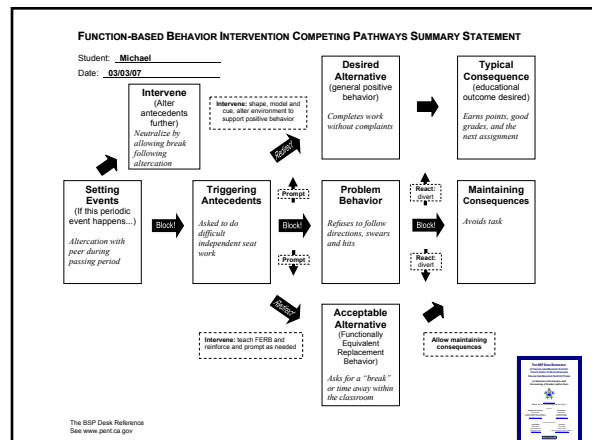

Some Assembly Required

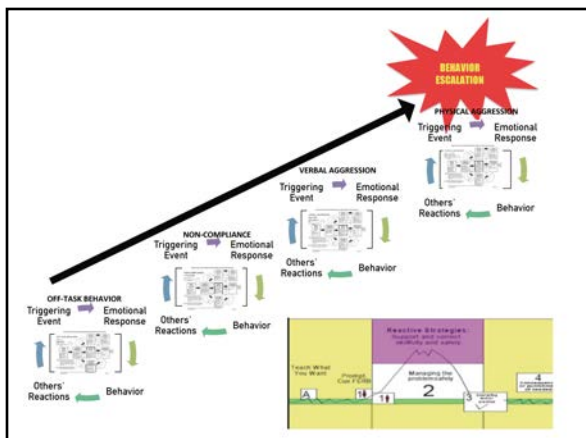

Assessment, Intervention and Progress Monitoring Activities

This slide features the SESA logo in the top left and bottom right corners. The central text reads "Assessment, Intervention and Progress Monitoring Activities". The background is white with a subtle pattern.

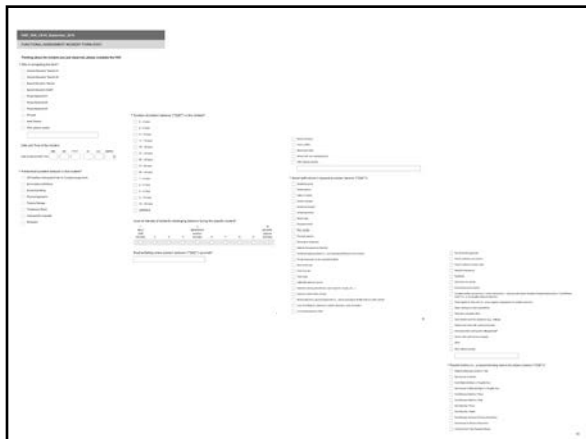

Functional Behavioral Assessment

Tele-Practice & Progress Monitoring

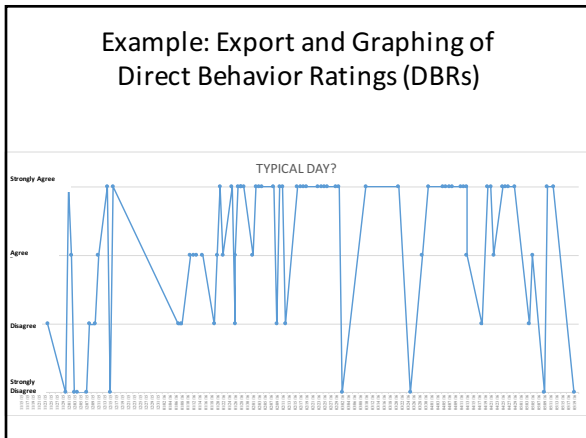

SESA
SPECIAL
EDUCATION
SERVICE
AGENCY

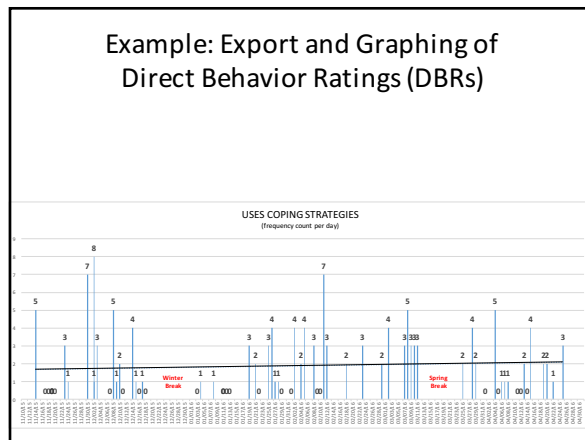

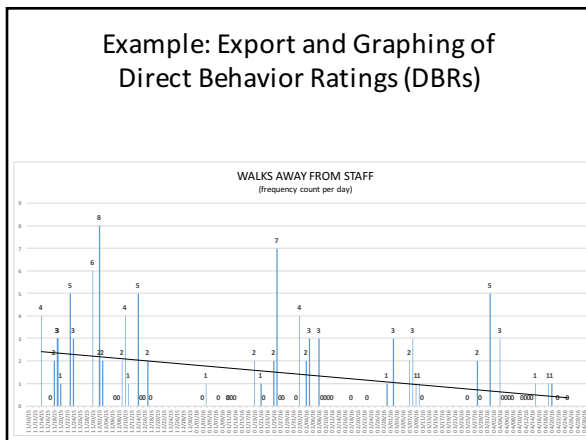

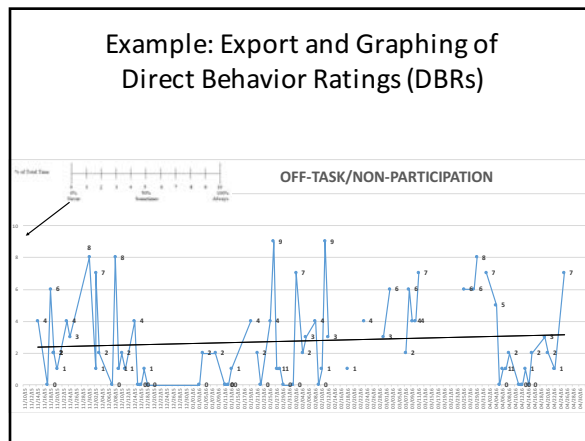

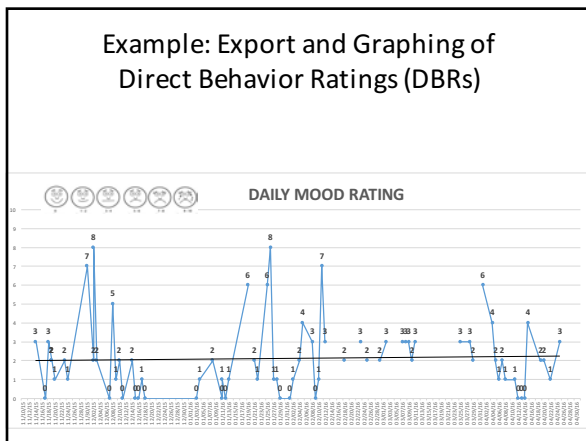

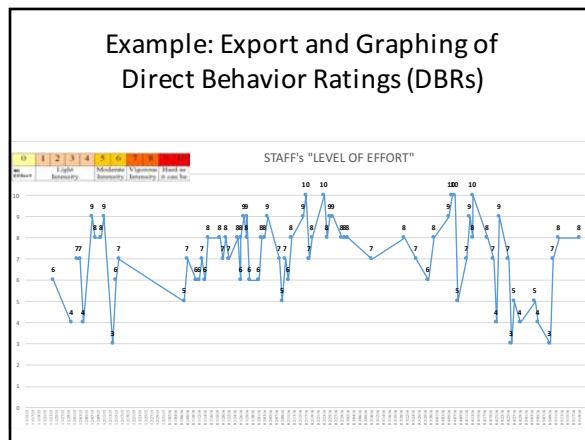

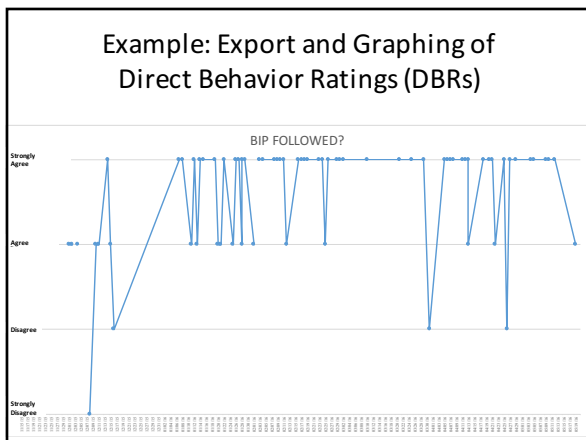

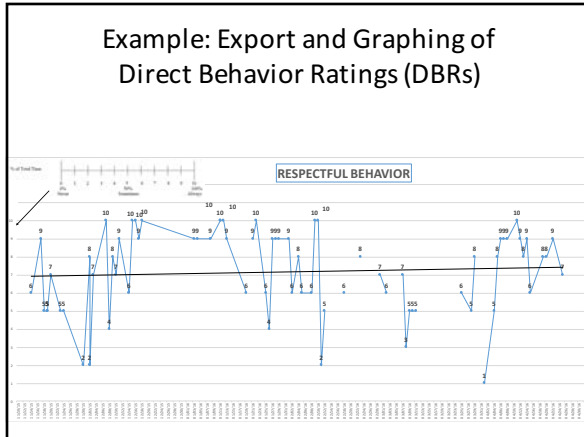

Remote access to specialized assessments systems, such as ...

- Progress Monitoring Systems
- Direct Behavior Ratings (DBRs)

Functional Assessment Incident Form (FAIF) Direct Behavior Ratings (DBRs)

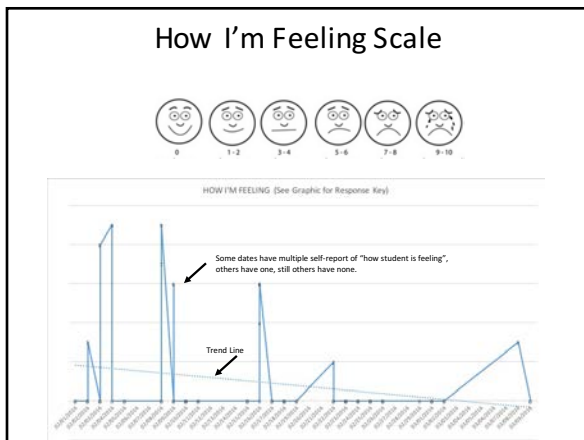

Tele-practice & Interventions (asynchronous technologies)

How I'm Feeling Scale

Learning How to Stay Calm Using My Strategies

Scaling and Reporting Feelings ("How I'm Feeling Scale"): Help the student identify intensity of feelings, create rules for strategies. Then, train by providing instructions, model strategies, allow student to rehearse and provide feedback, prompting use of strategies in school, and provide acknowledgement and/or reinforcement immediately as student uses strategy.

CLASS DOJO

Positive behaviors and skills...

These are behaviors students are working towards.

When a student is helping others, on task, participating, or using other positive skills, they will receive a Dojo point!

...and some to work on!

These are behaviors we are working on!

When a student doesn't turn in homework, is off task, talks out of turn, they lose a Dojo point.

If your student is losing Dojo points often, send me a ClassDojo message! We can chat about it.

See reports on these behaviors and skills every day!

"ClassDojo makes it easy to keep my students alert and on-task!"

Teachers: Try it right now!

Summary of Asynchronous Tele-Practice

Indirect Functional Behavioral Assessments

- Comprehensive Functional Behavioral Assessment Survey (CFBAS)
- Functional Assessment Incident Form (FAIF)**

Interventions

- How I'm Feeling Scale
- ClassDojo

Progress Monitoring (can use Boomerang for gmail)

- Direct Behavior Ratings (DBR)
- Functional Assessment Incident Form (FAIF)**

****dual purpose tracking major incidents for assessment and progress monitoring**

Blended Tele-Practice Using Secure IP Cameras (audio & video)

Elyse Johnson installs a Y-CAM remote observation system at Anigwin School in Elm, Alaska.

Mandy Sullivan and Melody Clifford of Whittier Community School demonstrate how easy it is to hang and bring down the Y-CAM remote observation system.

Blended Tele-Practice Using Secure IP Cameras (audio & video)

Specialists “access the learning environment” figuring out what works for schools, agencies, on-site staff, family, and student

Allows for ...

- More frequent, unobtrusive (i.e. reduced reactive effect) observation, assessment, progress monitoring
- More robust consultation services

Blended Tele-Practice Using Secure IP Cameras (audio & video)

But also ... when “Remote Reality” surfaces

- Travel budget cut OR runs out

IP Camera Technology from “the Early Days”

The graph shows the frequency of IIR (Inappropriate Interactions) over a 9-hour period for four different groups. The y-axis is labeled 'Frequency of IIR (Number)' and the x-axis is labeled 'Hourly Sessions Across 9 Hour Period'. The lines represent different groups, with one group showing a significant peak in the middle of the period.

Cloud-Based, Encrypted Audio-Video Camera w/ Speaker

Tele-practice & Interventions
(audio & video-based technologies)

**OBSERVATION PLATFORMS
BEING LINKED TO INTERVENTION**

Pre-schoolers get high tech education in Minnetonka

Tele-practice: Legal & Logistical Issues

“Tele-Practice Considerations”

- Legal Landscape
 - Public Schools Operate under FERPA
 - FERPA TRUMPS HIPAA*
- Implementer’s “status” under FERPA with state or school district
 - Legitimate Educational Interest
 - State employee, researcher, contractor (e.g., BCBA, School Psych, etc.)
- Consent of various parties
 - Administration, staff, student, & parents of student(s)
- Bandwidth, Equipment, Budget
- Level of Support
 - Tech support (i.e., onsite, off-site staff & EdTechs)
 - District admin and staff
 - Parents and community
- Does school / district have general release for video

What are the relevant legal guidelines?

School Videos and Student Privacy

What's the final rule?

Sara Clark
Deputy Director of Legal Services
Ohio School Boards Association

presenter

Sara Clark, Deputy Director of legal services, Ohio School Boards Association

sttrainor@nsba.org

Hypothetical #2

One student in video

- Parent has right to “inspect and review” the education record

Multiple students in video

- Official guidance – no right to inspect and review portions that contain information on more than one student; need consent of all parents
- Unofficial guidance – Only education record for those “directly related;” either parent may view without consent

School Videos and Student Privacy

What's the final rule?

Sara Clark
Deputy Director of Legal Services
Ohio School Boards Association

How do FERPA and HIPAA Intersect?

Joint Guidance on the Application of the Family Educational Rights and Privacy Act (FERPA) And the Health Insurance Portability and Accountability Act of 1996 (HIPAA) To Student Health Records

November 2008

NOTICE

Please be advised that audio and video recording might be occurring in this area.

Parent Consent Form
Alaska Distance Delivery Program (AK-DDPP)
Distance Delivery Program and Emergency Allowance

Lynn Johnson, Education Specialist (907) 534-1300 OR (907) 654-5670

About the Alaska Distance Delivery Program Project:
The Special Education Service Agency (SESA) is using distance technologies to extend access to distance education and related services and supports to students with disabilities. The program uses an Internet Protocol (IP) video and audio platform to securely connect them.

Request for Participation:
Your child, _____, has been identified as a student who would benefit from services via remote education. School District and SESA request permission for your child to be part of the program.

Voluntary Nature of Participation:
Your child's participation in the program is voluntary. You may decline consent for your child to participate in the distance delivery program at any time.

Provide your INITIALS to indicate your child can participate in the AK-DDPP program.

I, _____, do hereby understand and agree to SESA's audio and video retention policy that specifies audio and video recordings will be deleted a short period of time after use by SESA facilities. My permission is granted for three (3) calendar years from the date of my signature below.

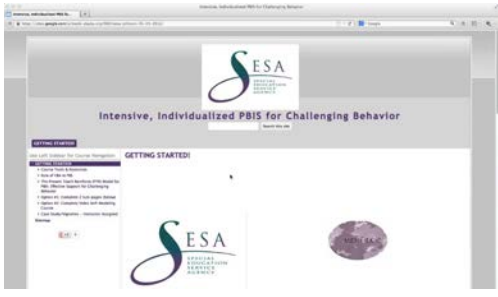

I, _____, do hereby understand and agree to SESA's audio and video retention policy that specifies audio and video recordings will be deleted a short period of time after use by SESA facilities. My permission is granted for three (3) calendar years from the date of my signature below.

Summary

Alaska, at 570,380 square miles, is the largest state in the United States of America. A significant portion of the state's population lives in rural or remote towns or villages, not connected by road systems. Regional air taxi services and/or the state ferry system provide transportation between the major population centers of Anchorage, Juneau, Fairbanks and Alaska's many rural and remote communities. Alaska presents unique challenges for providing training and professional development services educational and community-based developmental disability and behavioral health providers. Alaska's vast geography creates logistical challenges and weather issues create havoc, especially when training regimens rely primarily on face-to-face modes of professional development. Even if an intensive training regimen is successfully delivered, frequent staff turnover in Alaska's rural areas can diminish the capacity and impact of prior trainings. Consequently, these issues can adversely affect the quality and continuity of services delivery for educational and community-based providers.

Consequently, a significant need exists in Alaska for providing professional development, training, and coaching to build capacity of providers in the area of delivering high quality applied behavior analysis programming. This is especially true in the research literature for the efficacy of training in the area of functional behavioral assessment to inform evidence-based interventions. Behavioral Skills Training (BST) is a research-based method to teach new skills to learners and initial research suggests that BST procedures as an effective and efficient means to train providers in various functional behavioral assessment methods, such as indirect assessment, descriptive analysis and functional analysis. Moreover, e-technologies have expanded the delivery formats available to trainers and trainees. Training can be delivered through a host of readily available e-technologies, which extend the pool of potential trainees by combining distance synchronous and asynchronous learning. This paper will bring review the different types of functional behavioral

Incentivizing Supplemental Training

- Organizations
 - Sharing of content is a "win-win" for non-proprietary organizations
 - Analytics of viewership is KEY
 - Repackage previously made content into new uses
 - Fulfilling mandatory training requirements
- Educators and Providers
 - Fulfilling mandatory training requirements
 - University Credits (series of 1, 2 & 3 hour courses)
 - CEU's by professional organizations
 - Food and camaraderie
 - Tangibles
 - Amazon.com Gift Cards (e-cards) awarded for intensive tasks completed outside of contract hours
 - Stipends for weekend trainings
