

Developing Systems as a Guide for Implementation of Efficient & Effective Tier 3 Supports

Jodie Soracco, M.Ed, BCBA, LBA

Traditional

What is Tier 3 Anyway?

- 1-5% of the student population that require more intensive and individualized supports
- Includes evidence-based interventions

Reducing the intensity and/or complexity of existing (prevalence) problem behavior that are resistant to and/or unlikely to be addressed by primary and secondary prevention efforts by providing most individualized responses to situations where problem behavior is likely.

When there are too many students that require Tier 3 services a school risks:

- Diluted interventions
- Becoming compliance driven
- Relying on reactive strategies
- Decrease access to less restrict environments

Tier 3 is **MOST** EFFECTIVE when Tiers 1 & 2 systems are implemented!

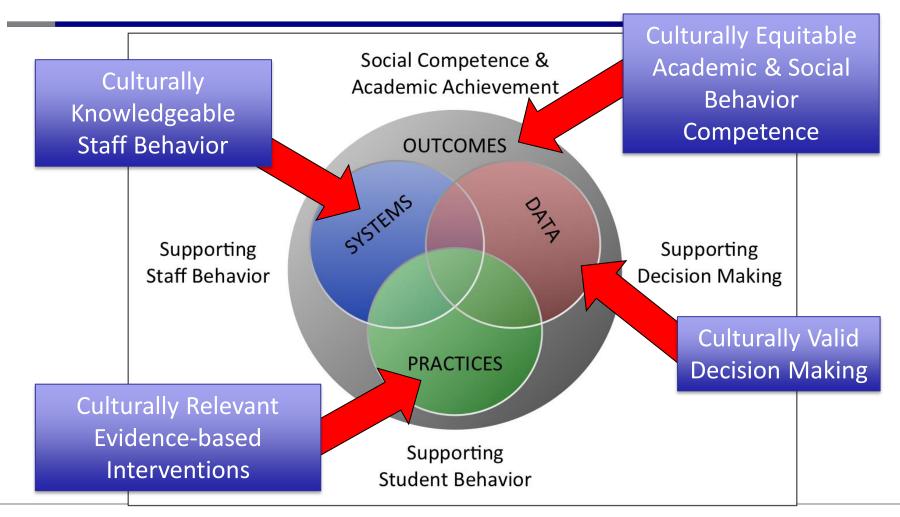

Continuum of Tier III Supports

Increasingly tormal and complex as student needs

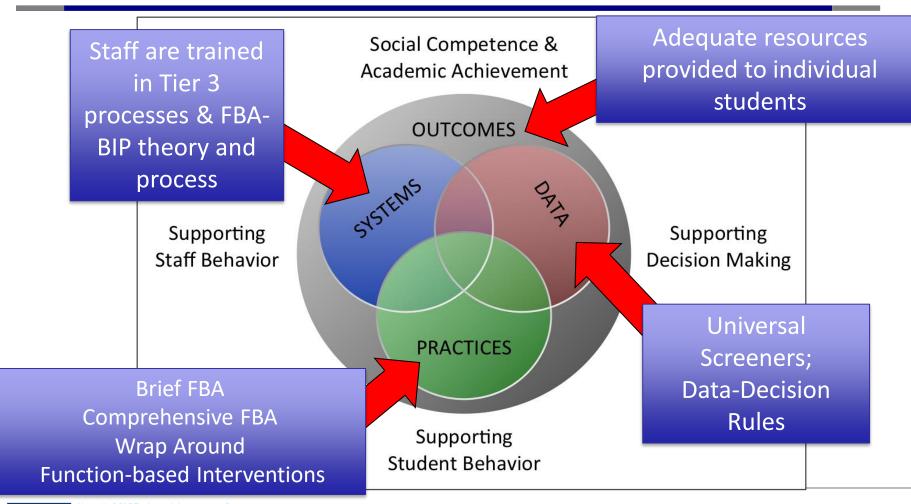

4 Key Elements

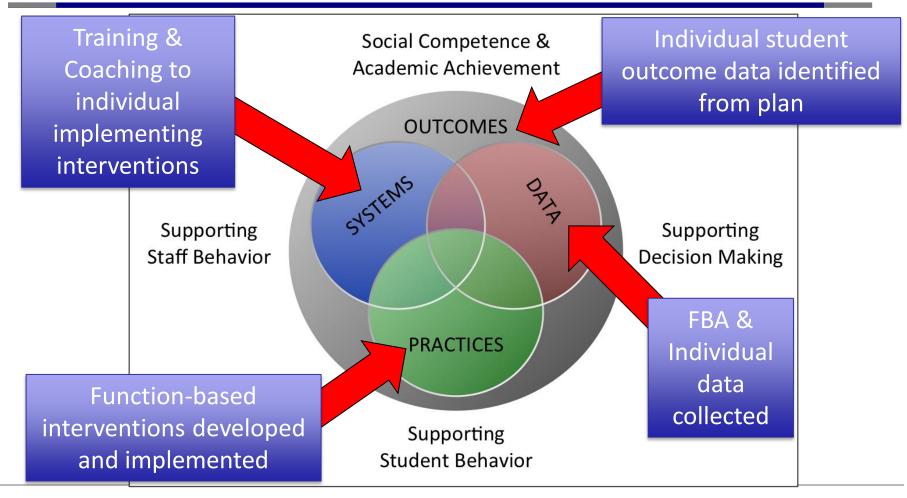

Tier 3 Elements at the School Level

Tier 3 Elements at the Student Level

DATA

Which Students Need Tier III Supports?

• When:

- A student receives many referrals
- A student exhibits severe or dangerous behavior
- School-wide screenings and teacher referrals identify a student with problem behavior
- School-wide, classroom, or targeted group interventions have not resulted in improved behavior for the student
- A student in a special education setting has persistent or violent behavior – these students may not generate office referrals

Students who require Tier 3 supports have not had success with Tiers 1 and 2 alone

Office Discipline Referrals

- May miss students in special education settings with persistent or violent behavior who may not generate office referrals
- May not identify students with severe "internalizing" behaviors
- May not identify students with many "minors" but few "majors"
- May not reflect that some teachers refer and some don't

Universal Screening for Tier 3

Teacher & Student Risk Grade Level - Screening Nomination - Scale-IE - Group identified for DDR process

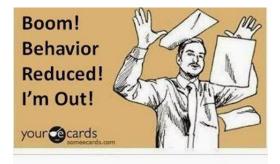

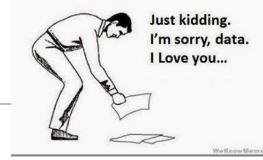

Data Decision Rules

Teams need to consider how they will decide which students receive Tier III interventions

Continuum of Tier III Supports

axedo.con

Brief VS Comprehensive FBA

| | Brief | Comprehensive |
|-----------------------|--|---|
| For: | Students with mild to moderate problem behaviors (behaviors that are NOT dangerous or occurring in many settings) | Students with moderate to severe behavioral problems; may be dangerous and/or occurring in many settings |
| What: | Relatively simple and efficient process to guide behavior support planning | Time-intensive process that also involves archival records review, family- centered planning, and collaboration with agencies outside of school |
| Conducted By Whom: | School-based personnel (e.g., teachers, counselors, administrators) | Professionals trained to conduct functional assessments with students with severe problem behaviors (e.g., school psychologists, behavior specialists) |

OUTCOMES & EVALUATION

Tier III Evaluation

- Level of Use System
- Fidelity of Support Plan Implementation System
- Student Outcomes Individual Student
- Annual Evaluation System

Level of Use

- What % of all students receive Tier 3 support?
- Are subgroups equitably represented in those receiving Tier 3
- Are students receiving Tier 3 responding to the intervention(s)
- Are subgroups equitably represented in those responding positively to intervention at Tier 3?

Fidelity of Support Plan Implementation

- Intervention integrity or process data is used:
 - To monitor the effectiveness of the intervention itself
 - To make decisions regarding the continuum/menu of interventions/supports

STUDENT-LEVEL SYSTEMS

Tier 3 Systems Planning Team

Tier 3 Individual Student Teams

Student Oriented

BIP-Selection of Fx-based interventions Training & Coaching

Continuous Monitoring

Problem-Solving Team

FBA

Membership is uniquely designed with active input/approval from student/family (with a clear link of team membership to student strengths and needs), and meet regularly

DATA

At a minimum, the team should review the postintervention data every two weeks.

Example: Behavior Rating Scale With Anchors

Intervention

PRACTICES

Interventions are Selected Based on Function

Nevada PBIS Technical Assistance Center College of Education University of Nevada, Reno/0285 Reno, NV 89557-0502

PTR Intervention Checklist

Directions:

- After reading the summaries of the interventions in Chapter 5, review your hypothesis statement on the PTR Functional Behavior Assessment Summary Table from Chapter 4.
- Select the interventions that match the information in your hypothesis. Please select at least two interventions but no more than four in each category (Prevent, Teach, Reinforce). The interventions marked with asterisks are required and must be selected.
- Rank order the selected interventions by placing a 1 in the box next to the most highly preferred, a 2 next to the second most preferred, and a 3 next to the third most preferred.

| Student | School |
|------------|--------------|
| Date | Completed by |
| Hypothesis | |

| PREVENT Interventions | TEACH Interventions | REINFORCE Interventions | | | | | |
|--|---|---|--|--|--|--|--|
| Providing choices Transition supports Environmental supports Curricular modification (eliminating triggers) Adult verbal behavior (just be nice) Classroom management Increase noncontingent reinforcement Setting event modification Opportunity for prosocial behavior (gee support) | **Replacement Behavior Functionally equivalent Physically incompatible Specific academic skills Problem-solving strategies General coping strategies Specific social skills Teacher-pleasing behaviors Learning skills strategies | **Reinforce Replacement Behavior Functionally equivalent Physically incompatible Discontinue reinforcement of problem behavior Group contingencies (peer, teacher) Increase ratio of + to – responses Home-to-school reinforcement system Delayed gratification | | | | | |
| Peer modeling or peer reinforcement | Self-management (self- monitoring) Independent responding Increased engaged time | | | | | | |
| Does the severity or intensity of the student's problem behavior pose a threat to self or others? O Yes O No If yes, is a crisis intervention plan needed? O Yes O No | | | | | | | |

**All interventions marked with asterisks need to be selected and included in the student's PTR intervention plan.

Prevent-Teach-Reinforce: The School-Based Model of Individualized Positive Behavior Support by G. Dunlap, R. Iovannone, D. Kincaid, K. Wilson, K. Christiansen, P. Strain, and C. English. Copyright © 2010 Paul H. Brookes Publishing Co., Inc. All rights reserved.

Fidelity of Support Plan Implementation

- Intervention integrity or process data is used:
 - To monitor the effectiveness of the intervention itself
 - To make decisions regarding the continuum/menu of interventions/supports

OUTCOMES

Student Outcomes

- The team leader will ensure that the BIP includes an evaluation plan with:
 - A short-term goal that is reasonable based on current performance
 - Focused on increasing alternative behavior and decreasing problem behavior
 - A long-term goal focused on increasing desired behavior
 - Specific activities/procedures that will be used to evaluate progress
 - A <u>specific date</u> when the team will next meet to review progress

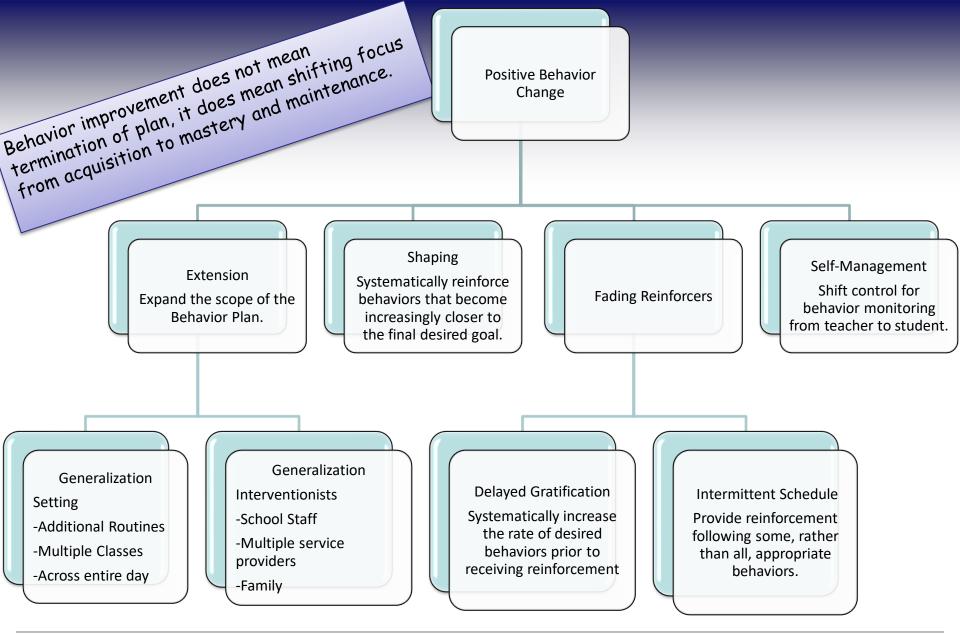

Student Outcomes

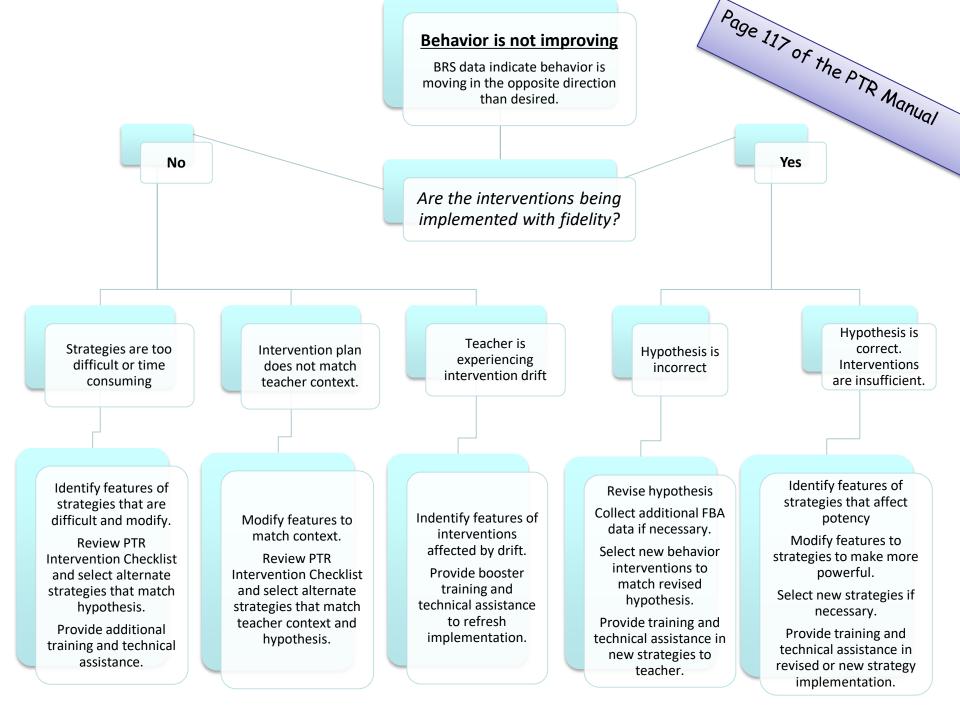

- Student outcome data is used:
 - To identify youth in need of support and to identify appropriate intervention
 - For on-going progress-monitoring of response to intervention
 - To exit or transition youth off of interventions
